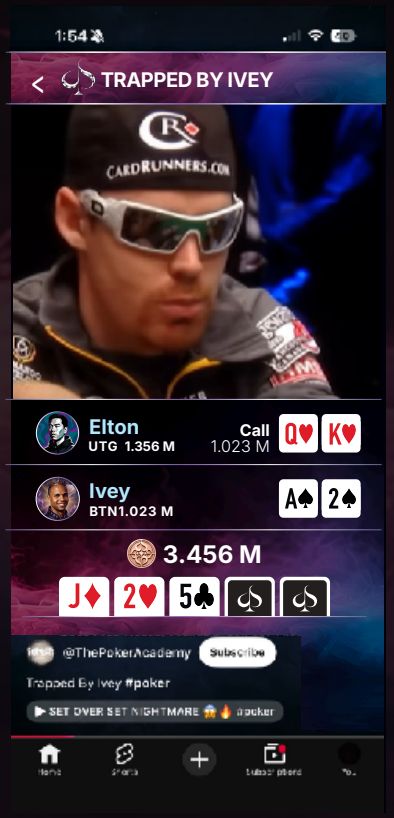
DEEPSTACK

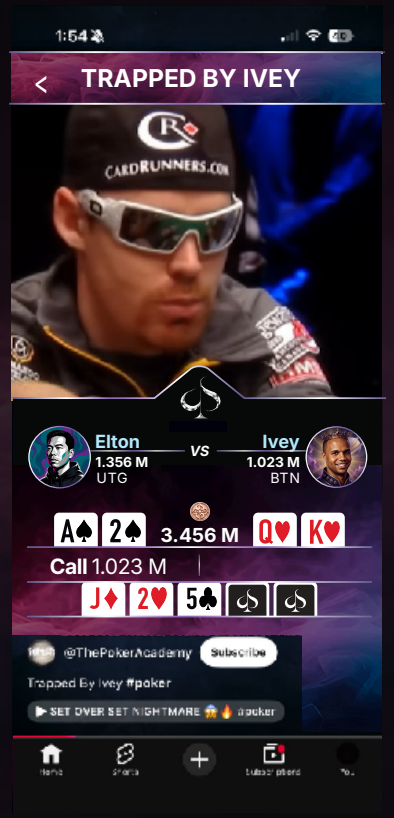
DS IG Shorts Overlays

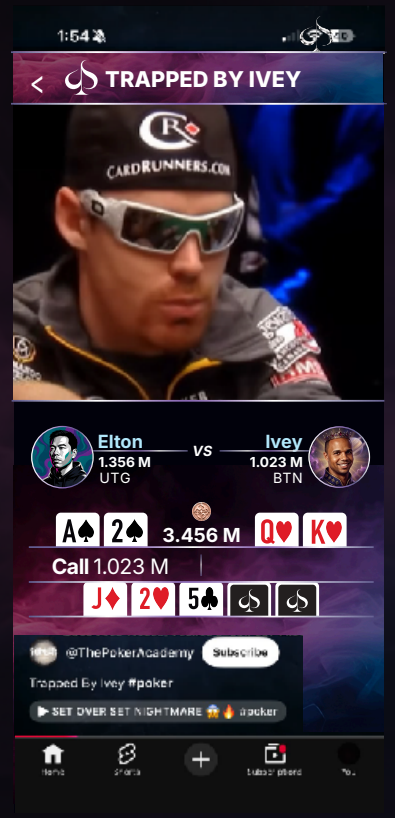
Nov 2026

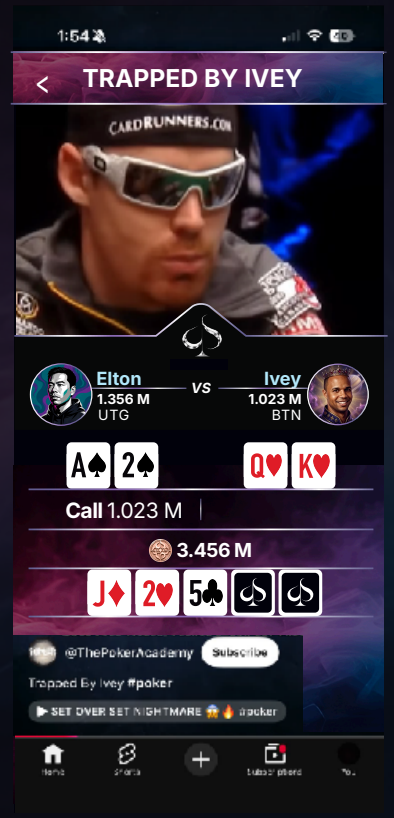
First Attempt

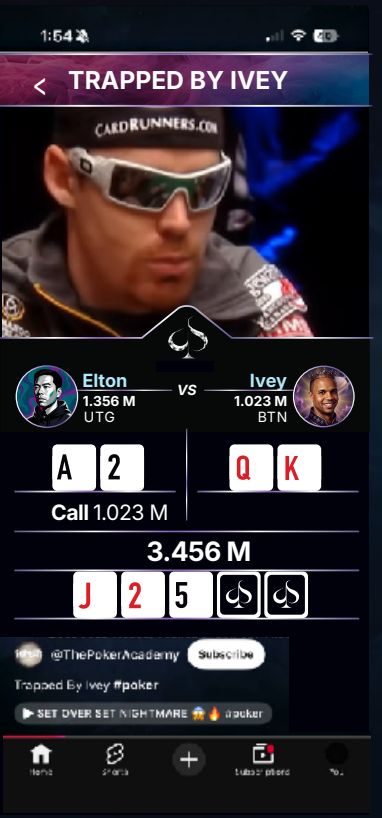
Implemented brand identity and re-designing. Developing based on the classic design on the left.











Gave up because the video frame is too small after all.

Portrait Overlays

Design 5

Design 5

Placing the hole cards on the second row reduces usage of vertical space. Show more , block less, cleaner looks.

DEEPSTACK | Portrait Overlays

Feedback from Elton

1. Need to maximize viewable area of the video
2. Add in BLUVV counts to make the video more engaging.

DEEPSTACK | Portrait Overlays

Third Attempt :

Further explorations based of Design 4 & 5 from last attempt.

DEEPSTACK

Portrait Overlays

Design Direction

- *Optimize Visual Real Estate:* Maximize video visibility by maintaining an ultra-minimalist overlay footprint, keeping the core footage unobstructed.
- *Drive Viewer Engagement via 'BLUVV' Integration:* Strategically feature dynamic BLUVV counters with high-impact visual feedback loops to heighten tension and escalate excitement.
- *Ensure Immediate Cognitive Retention:* Structure the layout with a strict visual hierarchy, allowing viewers to scan and process critical information instantly.
- *Reinforce Deepstack Brand Equity:* Infuse the user interface with unmistakable signature design elements, establishing immediate brand recall and platform identity.

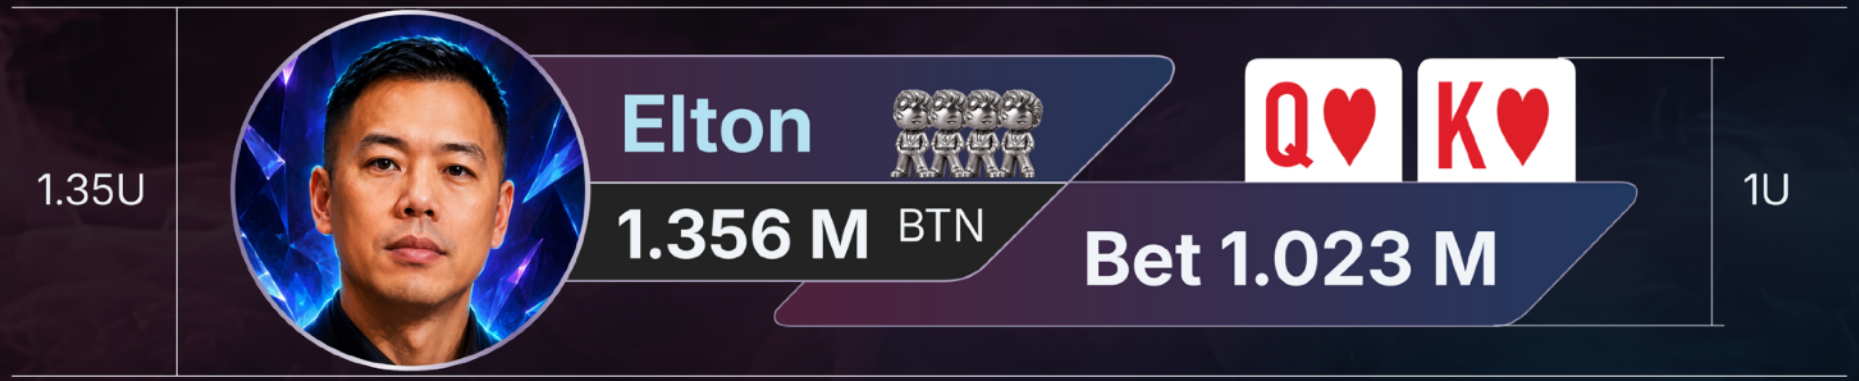
DEEPSTACK

Portrait Overlays

Style A

DEEPSTACK

Portrait Overlays



Placing the Hole Cards on the lower layer of the trapezoid saves substantial amount of vertical space.

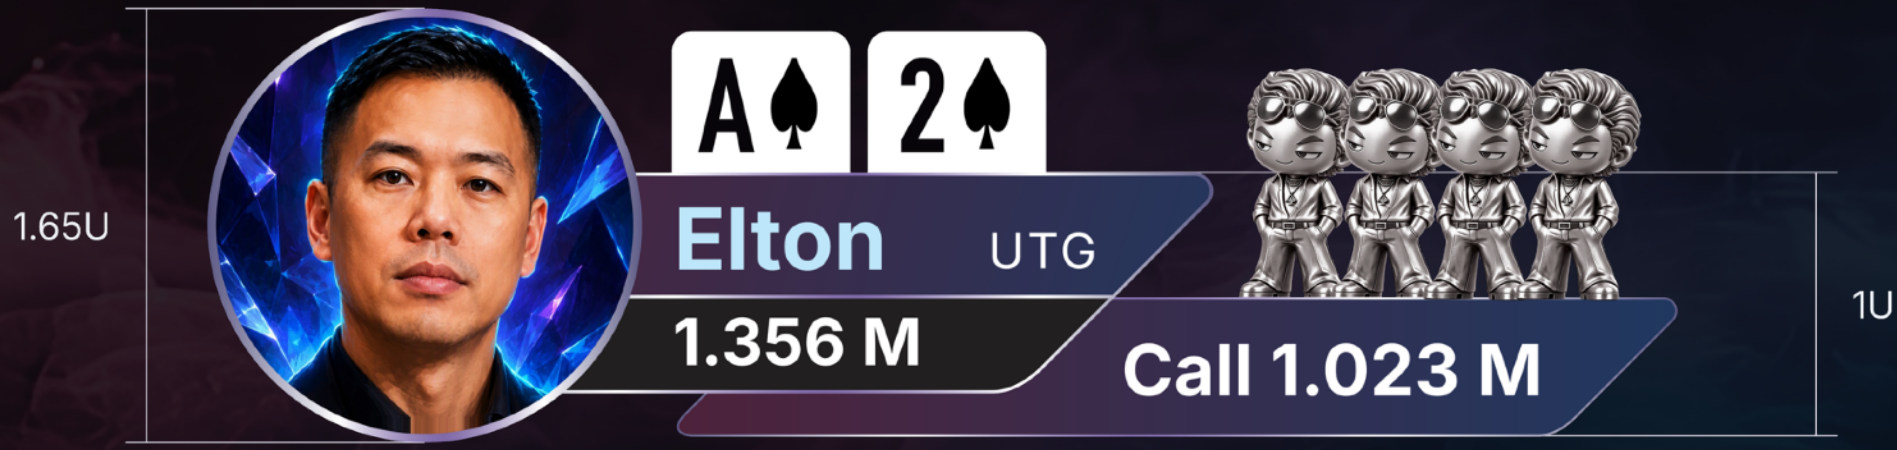
Style B

DEEPSTACK

Portrait Overlays



PROs : Bigger picture bigger cards, bigger BLUVVs.

CONs : Sacrifice vertical space, too tight to display 3 players all at once
