DEEPSTACK

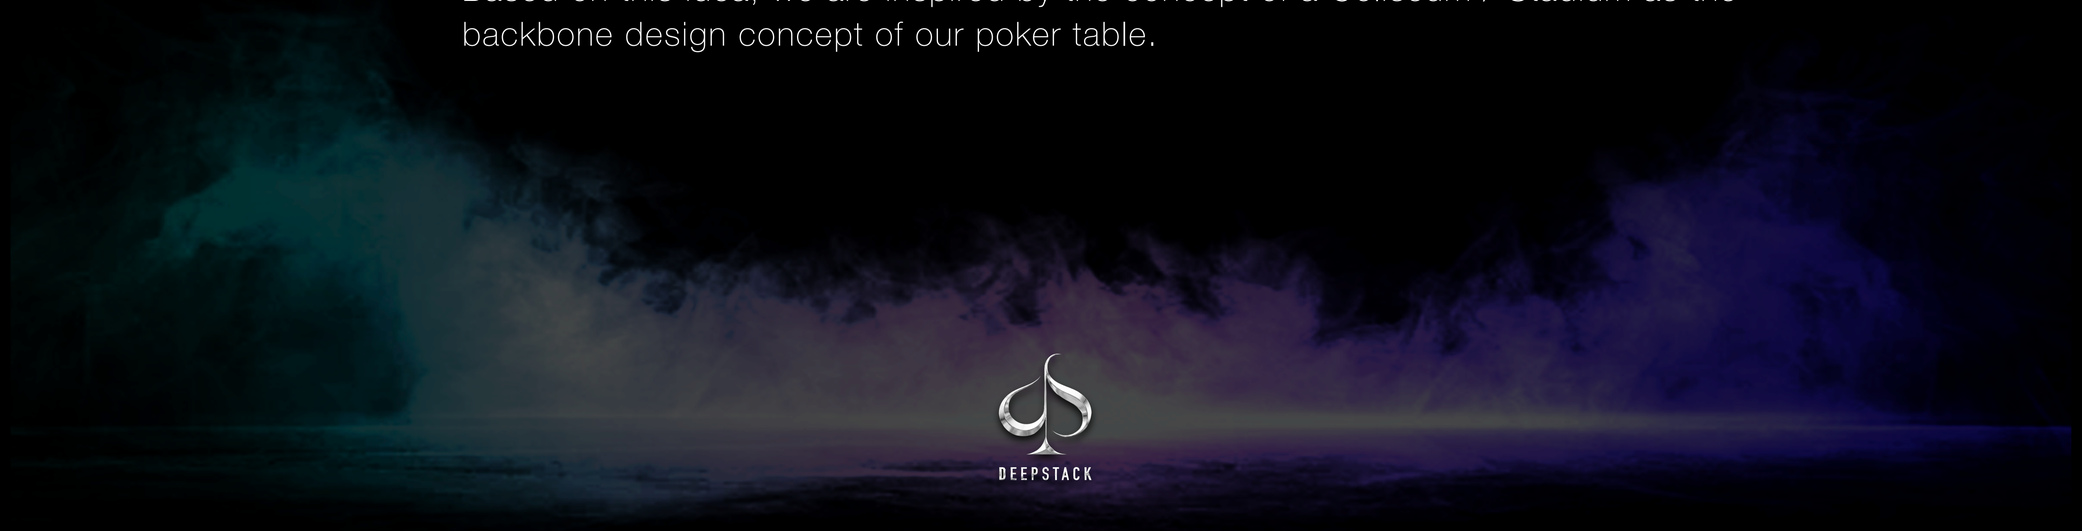

Presents:

THE COLISEUM

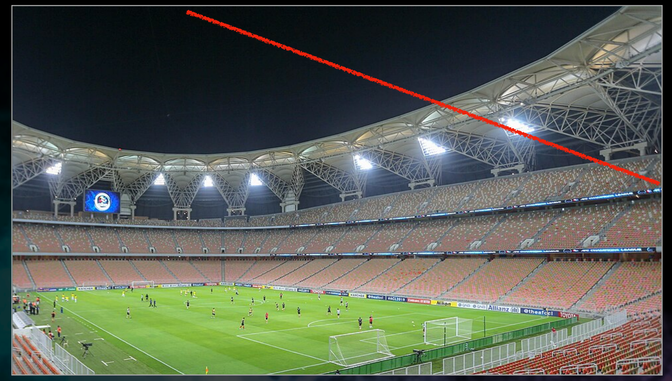

THE CONCEPT

Deepstack sees the poker table as a battlefield that only the strongests can exit alive. Based on this idea, we are inspired by the concept of a Coliseum / Stadium as the backbone design concept of our poker table.

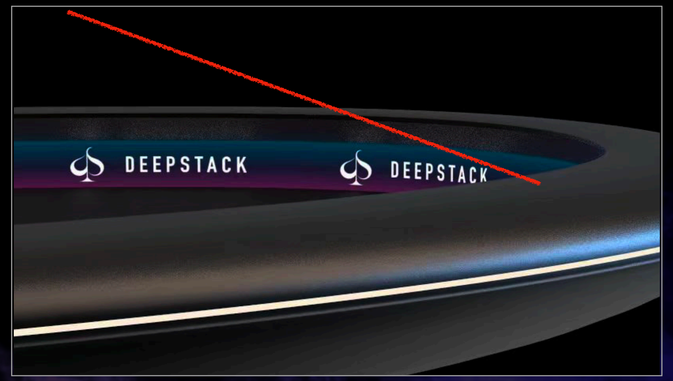

THE CANOPY

In order to give a slimmer and modern looks to our coliseum, we borrowed the canopy angle from the King Abdullah Sports City Stadium in Dubai.

King Abdullah Sports City Stadium

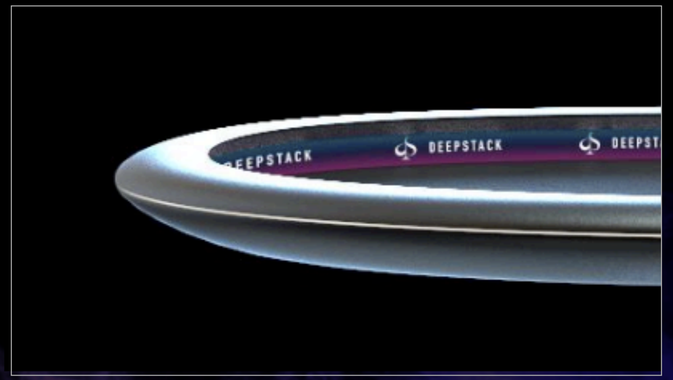

DEEPSTACK

THE EDGE

By incorporating the 'Blade' logo concept onto the armrest, we are creating a consistent visual impact and a holistic brand experience for our audience.

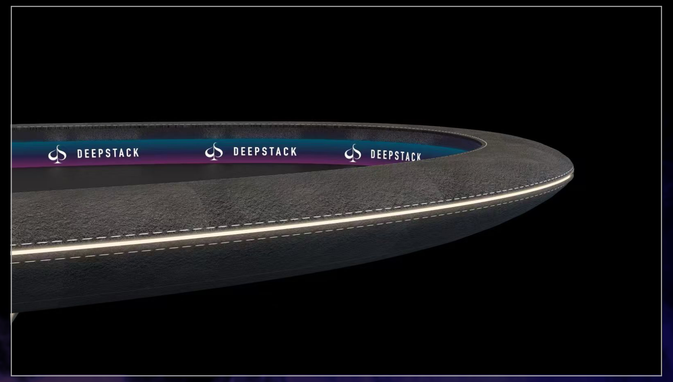

DEEPSTACK

THE ARMREST

Our sand-cast metal armrest feature internal heat tubes for climate-controlled, though we also offer an Alcantara option for maximum comfort. We control the height of the led strip within 1mm, giving it a more high-end look.

DEEPSTACK

THE FELT

We are keeping the design minimal to let the brand identity stand out on camera, applying an abstract graphic from the brand identity's color palette to create a sense of mystery.

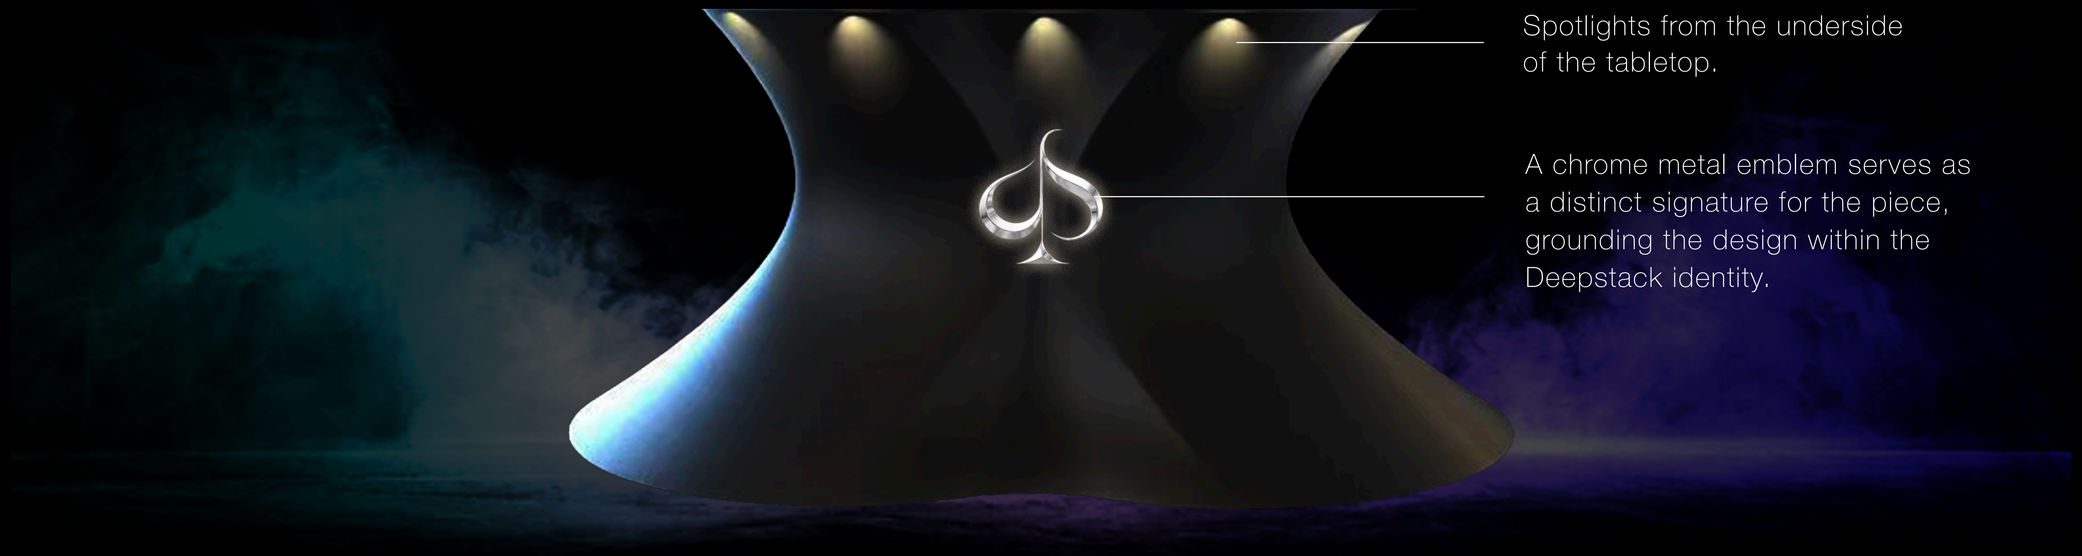

THE FELT

THE PEDESTAL

"We designed the pedestal as a single, monolithic piece to keep the aesthetic as pure as possible. This Avant-Grade silhouette is unlike any other, offering a timeless impression that only Deepstack can provide."

Spotlights from the underside of the tabletop.

A chrome metal emblem serves as a distinct signature for the piece, grounding the design within the Deepstack identity.

THANK YOU
